

Sequence For Safely Removing

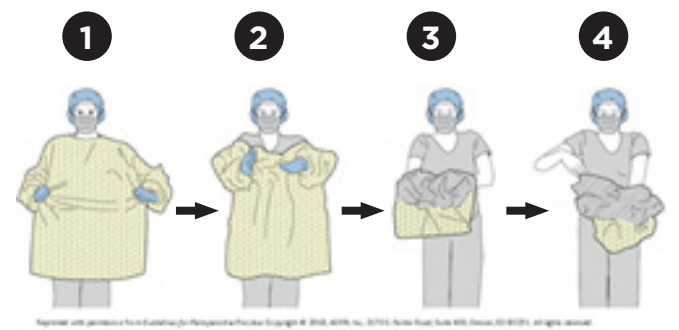

Personal Protective Equipment (PPE) for patient care that requires respirators, eye protection, gown and gloves.

Outside surfaces of gloves, gown, mask and respirator are contaminated!
If your hands become contaminated during PPE removal, immediately wash your hands or use an alcohol-based hand sanitizer.

INSIDE PATIENT ROOM

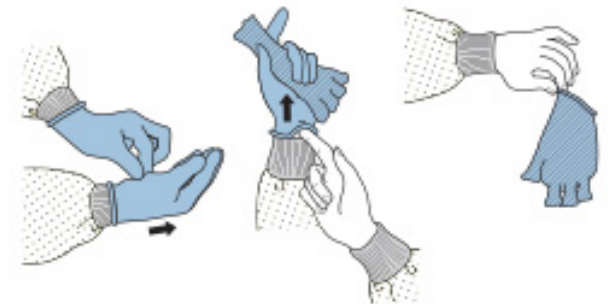

1. DISPOSABLE GOWN

- 1 Grasp the front of the gown with gloved hands
- 2 Pull the gown away from the body until attachments break
- 3 While removing gown, roll inside out into a bundle, touching only the outside of the gown with gloved hands.
- 4 Alternative doffing gloves with gown
 - Discard the gown into a waste container

2. GLOVES (Standard Doffing)

- Using a gloved hand, grasp the palm area of the other gloved hand and peel off first glove
- Hold removed glove in gloved hand
- Slide fingers of ungloved hand under remaining glove at wrist and peel off second glove over first glove

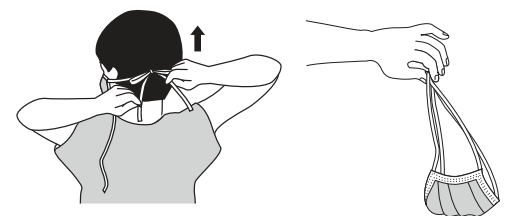

3. HAND HYGIENE

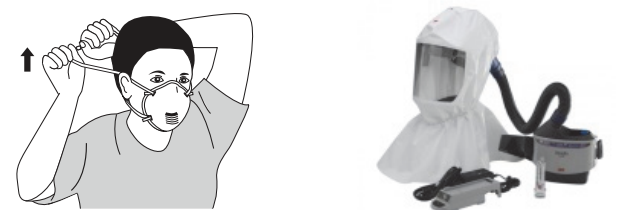

OUTSIDE PATIENT ROOM

4. RESPIRATOR (DISPOSABLE OR REUSABLE) + EYE PROTECTION

- Remove eye protection
- Remove mask if worn over respirator

- Grasp bottom respirator elastics, followed by elastics at the top
- Remove without touching front of the respirator
- Discard if disposable or clean per protocol if reusable

5. HAND HYGIENE
