

Your Care During the COVID-19 Surge

For Emergency Department and Admitted Patients

We are committed to providing you with the best care possible.

If your health care team decides you need hospital-level care, you may receive:

Care at this hospital

Because we are caring for so many patients, you may see your care team less frequently. You also may be cared for in locations that are not normally used for inpatient care. These areas are set up and staffed to provide the safest and best possible care.

Care at another hospital

We are working with other hospitals to carefully transfer patients to other facilities that can meet their care needs.

If you have any questions, please speak with a member of your care team.
